14 mm Construction With Click System

formaldehyde free

wood is a natural material that reacts to ambient light. all wood species change color after installation, some much more than others. a floor will get lighter or darker depending on the species, but this won't affect the beauty or quality of the floor. the actual look and color of a species may vary from what appears in this document. we cannot guarantee that all character marks and color variations will be represented on a small sample.

matt lacquer

the protective lacquer system makes Life resistant to wear and tear. the lacquer system makes our floors dirt-resistant and provides a surface that is easy to clean.

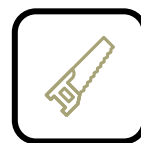

patented click

moderna comes with a patented click system that makes installation fast and easy, and allows for quick, hassle-free replacement of any damaged planks.

3 layered construction

the 3-layered pine core construction in engineered wood flooring enhances stability, reduces expansion and contraction, and ensures durability. this robust structure offers superior strength and resilience, maintaining floor integrity over time.

perfect for renovation

looking to renovate? moderna seamlessly fits with existing doors and thresholds. choose between floating or glued-down installation methods. it can be installed over an existing floor if installation requirements are met.
